About Cambrian Lab

Mission: To Provide Effective and Practical Solutions for Supply Chain Excellence

Team

Supply Chain, New Product Development and Technology Experts from SAP, Samsung, Siemens, GM, Ford, Applied Materials

Industries

Automotive, High-tech, Semiconductor Equipment, Medical Devices, Consumer Products

Locations

SF Bay Area, Detroit, Boston, Houston

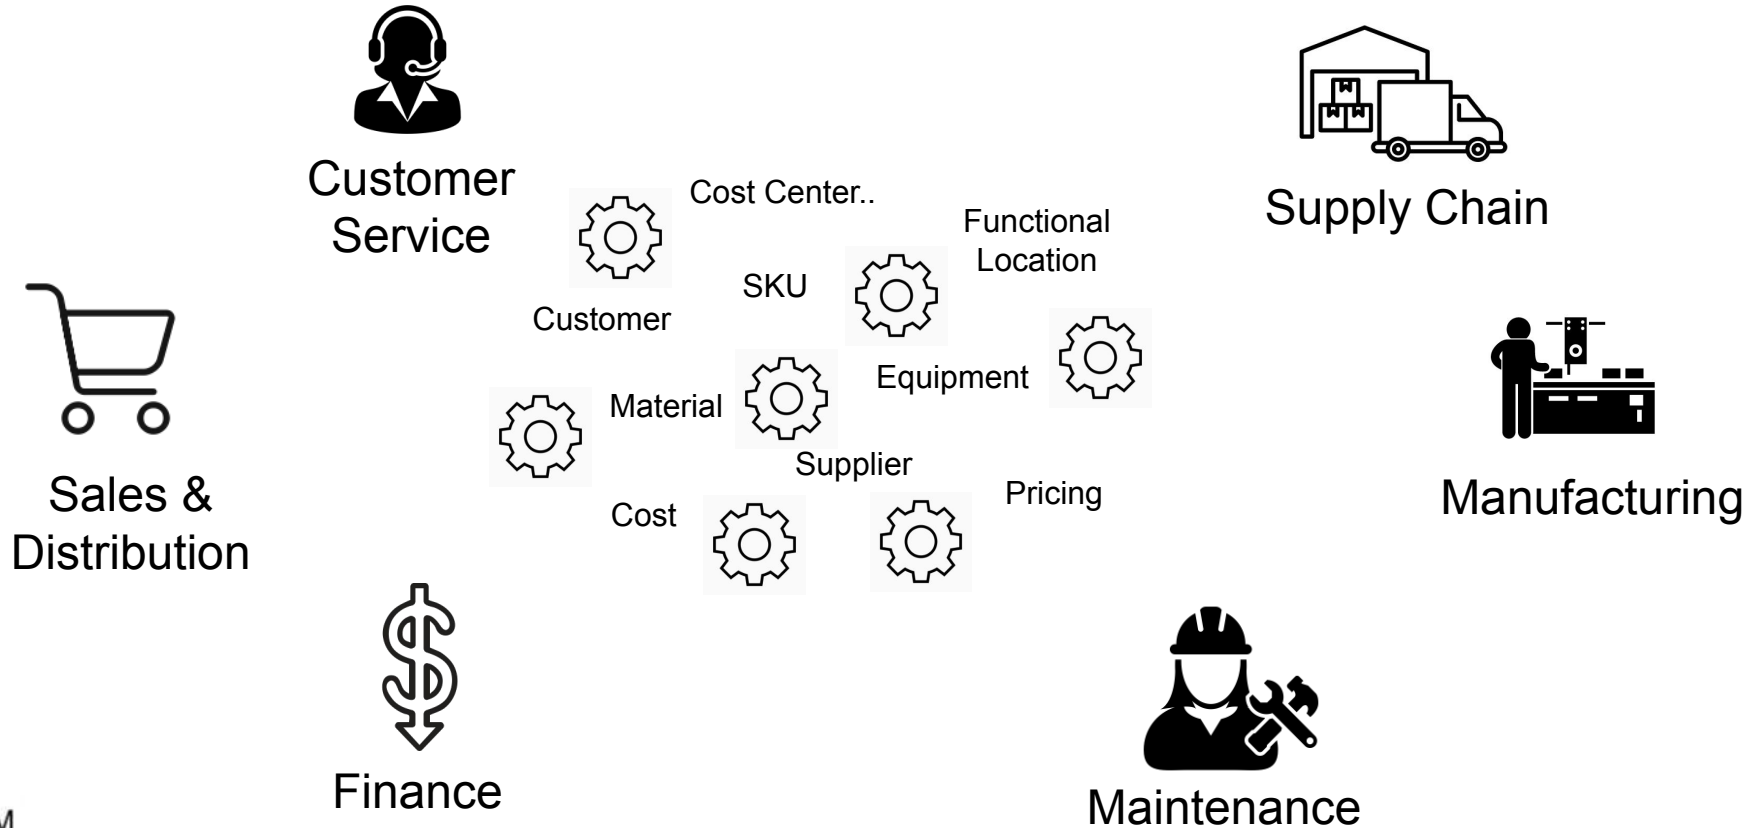

Expertise

- New Product Introduction, Supplier Development Quality Management, and Master Data Management
- Enterprise and Supply Chain Technology (ERP, SCM, Manufacturing, CRM, Sourcing, Finance)

Agenda

- Panelists
- Brief Intro
- Unique Challenges related to SAP Master Data
- Overcoming SAP Master Data Challenges with Digital Workflows
- Case Study - Smart Global Holdings
- Demo
- Q&A

Good SAP Master Data is Critical for Operational Excellence

What we Observed about SAP Master Data Management

- Significant non-value added activity (80%+), long cycle times, fairly expensive business process
- High level of SAP expertise is required
- Business users are out of the loop
- Traditional MDM approaches provide limited coverage for master data domains, master data elements, and related workflows
- Poor master data processes can become an obstacle to operational and supply chain excellence

SAP Master Data Management

SAP Master Data Processes - Significant Non-value Added Activity, Long Cycle Times, and Expensive

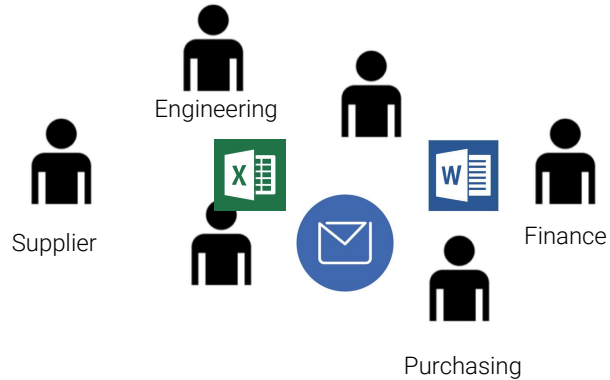

- Significant Non-value added activity
- Activities with waiting time

SAP Master Data Process Costs can Add up

Master Data Process	Master Data Domain	Annual Number	Current Process Cost	Total Annual Cost
New Material Creation	Material Master	1,000	250	250,000
Extending Materials	Material Master	5,000	120	600,000
New Part Request	Material Master	1,500	50	75,000
New Pricing	Material Master	5,000	25	125,000
Pricing Change	Material Master	10,000	10	100,000
Bill of Material	Material Master	200	150	30,000
Bill of Material Change	Material Master	800	75	60,000
Routing	Material Master	200	150	30,000
Approved Supplier	Material Master	600	40	24,000
Purchase Info Record	Material Master	600	25	15,000
Approved Supplier Changes	Material Master	1,200	40	48,000
Purchase Info Record Changes	Material Master	1,400	25	35,000
Approved Manufacturer	Material Master	1,800	25	45,000
Component Change	Material Master	2,200	20	44,000
Component End-of-life	Material Master	800	75	60,000
Product End-of-life	Material Master	200	150	30,000
Quality Planning Info	Material Master	1,200	45	54,000
...				
New SKU	SKU	200	150	30,000
SKU Submission to Amazon	SKU	300	50	15,000
SKU Changes	SKU	600	40	24,000
..				
New Supplier Request	Supplier	800	60	48,000
New Supplier Creation	Supplier	600	120	72,000
Supplier Blocking/Unblocking	Supplier	600	25	15,000
Supplier Info Change	Supplier	1,200	40	48,000
New Customer Onboarding	Customer	600	120	72,000
...				
..				
New Equipment Install	Equipment	400	80	32,000
Equipment BOM	Equipment	200	50	10,000
Total Master Data Process Cost				1,991,000

Cross-functional Master Data Workflows with Business Stakeholders Driving the Process

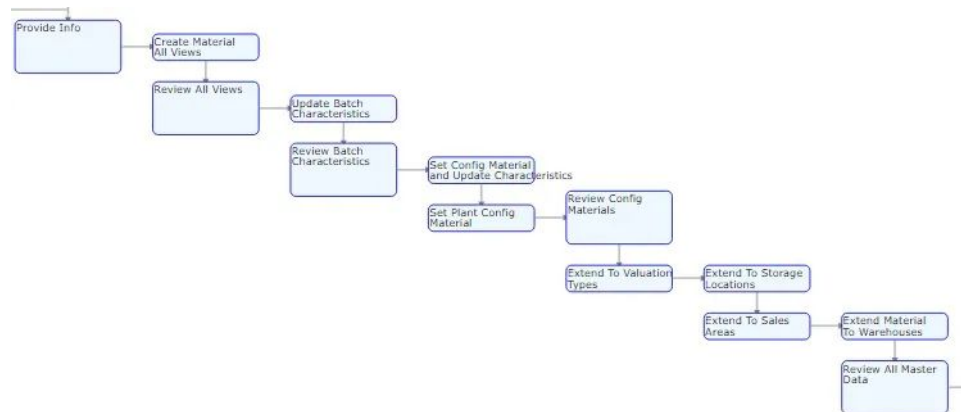

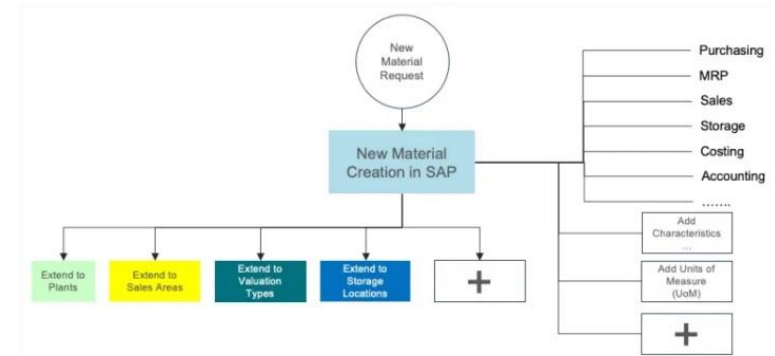

Coverage for Unsupported SAP Master Data Processes/Elements using (B)API based integration

Cross-functional Workflows Eliminate Non-value Added Activity, Minimize Cycle Time, and Reduce Cost of Master Data Processes

	Traditional Approach	Workflow-driven Approach
Process Cycle Time	30+ days	2-3 days
Process Cost	\$300-500	\$50
Actual Activity Time	2-3 hours	5 mins

Most Common SAP Master Data Workflows

Part/Item/Material Master Data Management

- New Part Material(s) Request
- New Material(s) Creation
- Copy Material to create New Material
- Extend Material(s) to (Plant, Storage Locs, Sales Orgs
- Change Material(s)
- Delete Materials
- Specification
- Class/Characteristics (SAP)
- Packaging Master Data
- Recipe
- Pricing Condition
- Source Lists
- Purchase Info Record
- Approved Supplier/Manufacturer
- ..

Maintenance Master Data Management

- Functional Location
- New Equipment Commissioning
- Maintenance Plan
- Work Center
- Equipment Movement
- ...

Supplier Master Data Management

- New Supplier Request
- New Supplier Onboarding
- Extend Supplier
- Partner Functions
- Block/Unblock Supplier
- Update Supplier Master Data
- ..

Customer Master Data Management

- New Customer Onboarding
- New Customer Creation
- Customer Hierarchy
- Partner Functions
- New Ship-to Location
- Block/Unblock Customer
- Update Customer Master Data

Manufacturing Master Data Management

- Work Center
- Routing
- Bill of Material
- Recipes
- Production Version
- ..

SKU Master Data Management

- SKU Lifecycle Management
- New Product Introduction
- Ecommerce Integration (Amazon, Shopify, Google Merchant Center...)

About Smart Global Holdings (SGH) and Penguin Edge

Our diverse lines of businesses, across computing, memory, and LED lighting solutions, all focus on serving customers by delivering engineer-driven technology solutions to specialty end markets

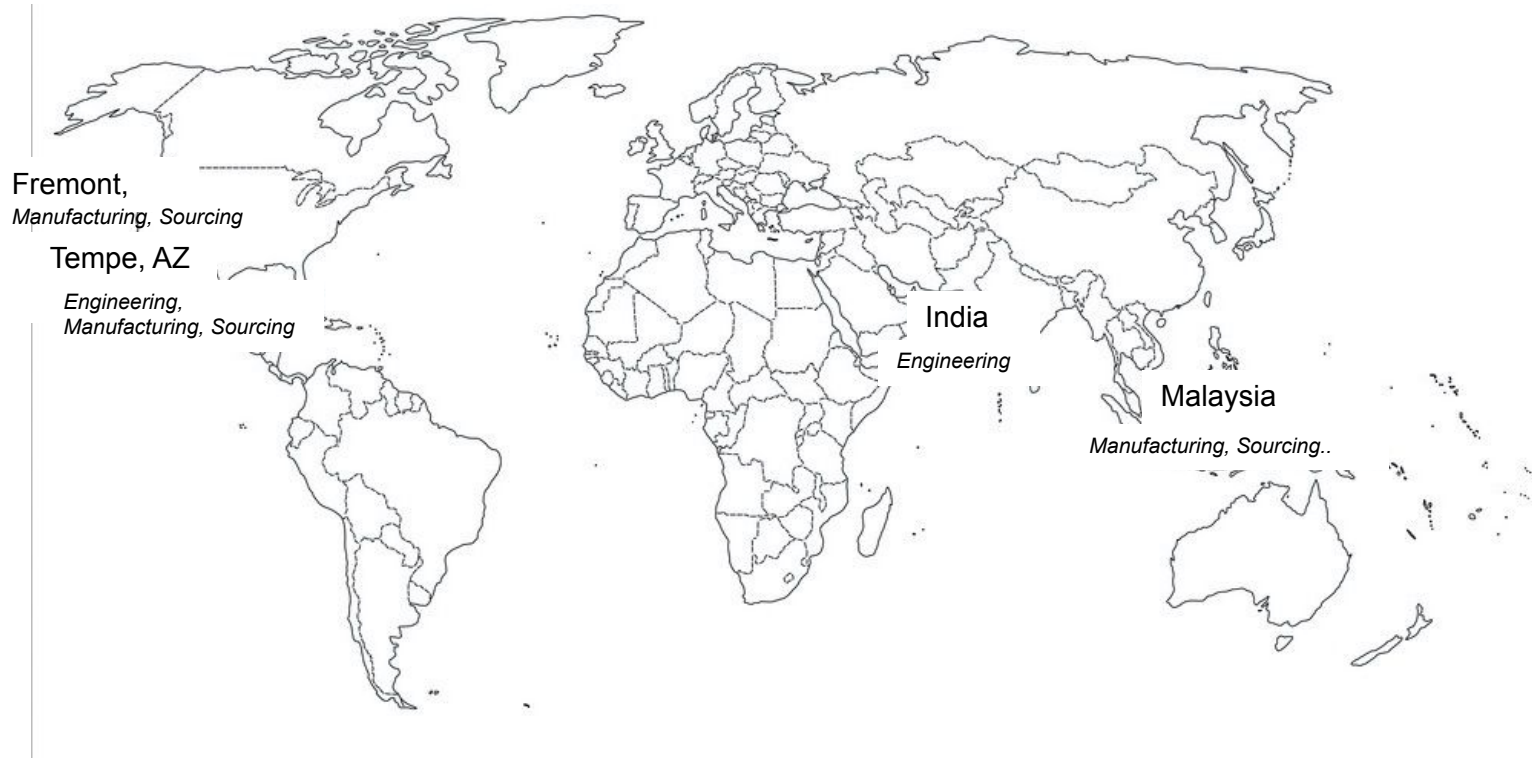

Key facts:

- ~4000 employees with the headquarters in California
- Manufacturing lines in US, South America and Asia
- Facilities across the globe
- Brands:
 - *Smart Modular (Memory Solutions)
 - *LED Solutions (CREE LED)
 - *Penguin Solutions (Intelligent Platform Solutions – IPS)

Penguin Edge is part of the Penguin Solutions Business unit. We provide deep expertise in embedded system design and development of smart devices for retail, medical, telecom, military and industrial products.

Product Lifecycle and Master Data Stakeholders

Our PLM Process Transformation

- Started with the move from Oracle to SAP
- Workflow driven PLM Processes (NPI, Release Processes, ECR/ECO, Component Engineering, BOM and Life Cycle Management) deeply integrated to SAP
- Deep integration with SAP and other applications

PLM Processes and System Coverage

- ZFlow and Oracle/SAP
- Set up processes and templates for :
 - ECO (Engineering Change order & post process)
 - CCN (Component change Notice)
 - PCN (Part change notification)
 - RN (Release notice)
 - NPR/NPMR (New part number (MFG) request)
 - Import BOMs/Part numbers
 - Bulk part numbers and BOM upload to SAP
 - Repository for documents
 - Datasheets
 - Customer notifications/PreAlerts

PLM Workflows and related Master Data Management

- Extremely user-friendly and easy to participate/understand for cross-functional business teams
- Very customizable and can support company/division specific PLM and related Master Data processes
- System is very reliable
- Direct integration to SAP and other systems (out-of-the-box and easy to configure)
- Higher efficiency (automation) and cycle-time reduction (workflow-based coordination)
- Customizable reports (Reviews, MPN quality checks..) and process improvement metrics (cycle times)
- Easy set up of workflows, conditions, templates and new accounts (accessible to business)
